

Business users can manage their profile via My Settings.

The screenshot displays the 'Personal information' and 'Login & Security' sections of the 'My Settings' page. The 'Personal information' section includes fields for Name (Liz Walker), Primary email (liz@classycatering.com), and Business Information (Classy Catering, Business ID: 4265267369). The 'Login & Security' section includes Username (lwalker), Password (masked with asterisks), and Security options (phone number (828) and 'Enable for text' dropdown). Three callout boxes provide additional context: 'Edit Email' (used for notifications and alerts), 'Edit Username and Password', and 'Security Options' (text enable a phone for MFA).

**Personal information**

Liz Walker

Primary email | [Edit](#)      liz@classycatering.com

**Business Information**      Classy Catering  
Business ID: 4265267369

**Login & Security**

Username | [Edit](#)      lwalker

Password | [Edit](#)      \*\*\*\*\*

Security options | [Edit](#)      (828)      | Enable for text ▼

**Edit Email** – used for system-generated notifications, user-elected alerts, and possibly login MFA. One allowed per user

**Edit Username and Password**

**Security Options** – text enable a phone for MFA. Click Edit for more options (next page).

**Security Options**

These settings impact login authentication and in-session authentication for approvals.

The screenshot shows the 'Confirming your identity' settings page. It includes sections for 'By phone', 'By security token', 'By authenticator', 'By email', and 'Current password'. Callout boxes provide additional information: 'Manage phone numbers (up to 4, set by FI)' points to the phone number input fields; 'Token - enter the credential ID (shows only if FI offers tokens)' points to the security token input field; 'Authenticator - an app the user downloads to generate a one-time access code (Google Authenticator and Microsoft Authenticator are suggested)' points to the authenticator section; 'Email - toggle on to use email for login MFA, not an option for approving payments/users (shows only if FI offers email for MFA)' points to the email toggle; and 'Enter password to save any edits' points to the current password input field.

## Security Options

Back on the main My Settings page, the user has an additional step to setting up Authenticator. They must open the app on their phone, and either scan the QR code on the screen or enter the code manually into their authenticator app.
